- alternative B: based on USA draft which would implicitly replace a number of other BA provisions.”

Article 12(3) requires contracting Parties to establish a central enquiry point where requests for relevant information may be addressed, and to inform the Charter secretariat of the details of this enquiry point.

Article 12(4) requires Contracting Parties to notify the charter secretariat of all laws and regulations relevant to the Basic protocol (and details of where such information may be obtained), plus any amendments to this information and reports on the implementation of energy policies.*
